Detailed Action

Response to Arguments

1. The Application's arguments with respect to claims 1-17 have been considered and they are persuasive.

Reasons for Allowance

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance.

One crucial difference between the teachings of Odhner and the present invention is that Odhner is directed to measuring server capacity, while the present invention, as recited in claims 1, 6, 11 and 16, is directed to determining manpower allocation for a distributed computer system, regarding the number of CPUs and amount of memory. In particular, Odhner fails to teach a first weighted asymptotic function of the count of CPUs install in each server, and a second weighted asymptotic function of the amount of random access memory installed on each server and a normalizing factor representing a reference data. Additionally, Odhner fails to teach a server count, although, Odhner measures the extent of server utilization or the maximum server load. Similarly, Odhner does not disclose the use of a normalizing factor based on a reference data.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
